About Yoga

Yoga is an ancient practice that originated in India over 5,000 years ago. It is a holistic discipline that integrates physical postures, breathing exercises, meditation, and ethical principles to promote overall well-being. The word "yoga" is derived from the Sanskrit root "yuj," which means "to unite" or "to join." The practice of yoga aims to create harmony between the body, mind, and spirit, leading to a state of balance and inner peace.

Historical Background

Yoga's origins can be traced back to the Indus Valley Civilization and the ancient texts known as the Vedas. The practice has evolved over millennia, with significant contributions from texts such as the Upanishads, the Bhagavad Gita, and the Yoga Sutras of Patanjali. The Yoga Sutras, written by the sage Patanjali, outline the eight limbs of yoga, which serve as a comprehensive guide to living a yogic life.

Yoga is a versatile practice that can be adapted to suit individuals of all ages and fitness levels. Whether you are seeking physical fitness, mental clarity, or spiritual growth, yoga offers a comprehensive path to holistic health and well-being.

Why Yoga Sciences?

The biggest asset of our country has been the research conducted on the mind and body. Even when there were no modern laboratories in the world, our scientists and philosophers had done research on the depths of the science of mind and body, on the basis of self-realization and introspection that are not possible to understand even in the most modern scientific laboratory today. The tradition that got developed after thousands of years of practice was named as 'meditation and yoga'. This is the matter of the pride with the fact that India has provided science of being mentally and physically fit to the people over hundreds of years in the form of 'meditation and yoga'.

Corona pandemic has brought a huge change in the life style, thinking and working style of people leaving patches and scars of loss of family, finance and health.

The world is adopting the Indian tradition science of increasing health quality through meditation and Yoga. People across the world come every week to participate in yoga and meditation to India. There are several programs running for a day or two which are focused on bringing yoga into our lives.

Through this grand vision of University more and more yoga practitioners will be created gradually, who will be active players not only in imparting and spreading this science but also will earn better livelihoods, and ultimately will contribute to build a calm, thoughtful and developed nation by empowering the overall health of the society.

Benefits of Yoga Sciences

- **Physical Health:** Yoga enhances flexibility, strength, and balance. It also improves cardiovascular health, respiratory function, and overall fitness.
- **Mental Health:** Regular practice of yoga reduces stress and anxiety improves concentration, and promotes mental clarity and emotional well-being.
- **Spiritual Growth:** Yoga fosters a deeper connection with oneself and the universe, encouraging self-awareness, inner peace, and spiritual development.

VISION

To grow and develop the Yoga professionals who can fulfill national and international aspirations.

MISSION

The University has been on a mission to make Punjab the best in the country not only in terms of imparting quality education but also to keep its people physically mentally and socially healthy through Indian System of Medicine.

To develop core competency in Yoga and Naturopathy sector and contribute in building leaders and personnel who can take up responsibilities as yoga science professionals, appropriate for community, institutions and industries on health and management related fields.

OBTECTIVES

1. To design, develop and impart various courses for Yoga, Meditation, and nutrition to promote healthy life style in the society.
2. To promote the concept of Meditation and Yoga as the complementary therapy and sound health.
